0% Poor

13. What would make this program better?

- Better Communication, more equipment, schools returning their information in a timely manner, funding for speakers, substitutes and transportation, be able to select t-shirt size or at least have large instead of extra large, would like T-shirts available for the volunteers, volunteers who follow directions, send enrichment materials to the individual schools instead of the site coordinator, more corporate involvement, have a statewide public service announcement about KKFD, decrease the number of enrichment materials (put additional materials on websites for teachers), have a coloring book instead of all the handouts, kids love the water bottles, have a soft ball in the enrichment packet, include a Frisbee in the packet, get sponsors for the water bottle, ball, or jump rope to defray costs, more games in the enrichment materials, not so much reading information (Kids loved the stickers), enrichment materials could be more stimulating (grade level appropriate, multicolor paper, one area of focus per year), Fort Larned could support more children in the afternoon (Last year they were not full), do the lottery drawing sooner, do we need the lottery? Could all sites be equally publicized or move the main site from year to year, Does every 3rd grade teacher in the state of Kansas get information about participation?, help site coordinators find funding, provide a list of school districts with the number of the 3rd grade classes to the site coordinators, better notification of the sites available, addresses of schools (Hutchison, Reno county), check list of things to do for participants (a form letter explaining the requirements, time and date), check list for coordinators, money for a pre-event breakfast, more sites available, work on PR to get more sites
